Supplementary Material 1

Pairwise sequence-identity heatmap of the macrolide esterases.

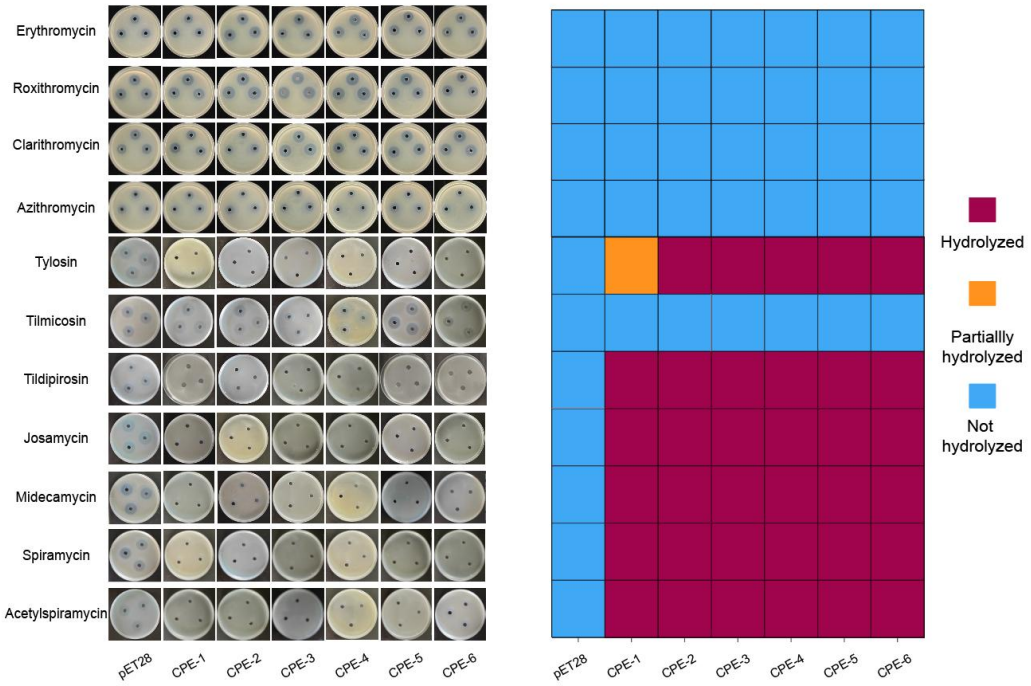

Supplementary Material 2

Spot-plating assay showing growth of E. coli strains carrying CPE1–6 or pET28a on Mueller–Hinton agar supplemented with 4 mg/mL tylosin at serial CFU concentrations.

Supplementary Material 3

Agar well diffusion assay and heatmap of macrolide degradation by purified recombinant CPE proteins.

(A) Inhibition zone assay showing antimicrobial effects of degradation products. (B) Heatmap illustrating antimicrobial activity.

Supplementary Material 4

SDS-PAGE analysis of purified recombinant CPE2–CPE6 proteins.

Molecular mass markers (kDa) are indicated on the left.
